

PASSI PLUS - DGR 1143/2024

A.L.I. PROJECT

The project is designed to offer free, customized training and social inclusion initiatives for 190 disadvantaged individuals, particularly targeting those who are marginalized in the labor market. This initiative seeks to enhance their social, linguistic, interpersonal, and professional abilities through various activities, including internships, workshops, support groups, self-sufficiency trainings, and psychological assistance for those facing difficulties. Special emphasis will be placed on foreigners and migrants, with the goal of improving their linguistic and cultural competencies as a vital initial step toward integration and social/occupational inclusion. The involvement of a cultural mediator will provide additional value, acting as a guide and reference point throughout the whole program.
